

Attendance

I have missed one class somewhere in final week of March coz I wasn't feeling well. I couldn't inform you coz it happened couple of hours before the class started.

Evaluation**Gautham Sriman**

Rating: 9

Gautham is real team player who understood the end goal and identified his role correctly. Gautham worked on coding and presentation.

Vishwas Kumar

Rating: 9

Vishwas is one of those team members who doesn't need to be reminded or needs supervision. He finished his task well before time and came forward with new ideas. He contributed in crawling and cleaning data and in preparing presentation.

Myself

I would rate myself 9 as well. I worked on Data visualizations using R since I have interest in R and have completed courses like Introduction to Statistics and Exploratory Data Analysis. I also worked in implementing naïve bayes for classification and in preparing presentation.
